Appian

Solutions for the Department of Defense

- Insight into process yields Complete Situational Awareness
- Provide maximum data security Cloud or On-Premise

- Rapidly develop new capabilities to respond to emerging event
- Secure Mobile solutions to support global missions

Today's military requires agile solutions that support the modern warfighter and their missions globally. With threats both home and abroad, the Department of Defense must be vigilant in achieving maximum readiness. Military Leaders and Civilians need IT solutions that are flexible and adaptable to rapid change. Under extraordinary budget pressure and public oversight, Defense agencies need to be able to remove some of the complexity often involved in deploying new capabilities.

The Appian platform provides the most flexible solution for meeting the needs of today's modern DoD. Appian is a business process management (BPM) driven application platform that unites all data, processes, and collaborations in one environment. Appian is easily accessible on any mobile device through a simple social interface. Our Solution allows organization to easily combine data from multiple systems and data sources into a single view.

UNIFIED CAPABILITIES FOR GLOBAL MISSIONS

Appian provides the Department of Defense with a rich set of tools to rapidly deliver complex capabilities:

Business Process Management: Quickly build solutions through drag-and-drop functionality

Dynamic Process Repository: Capture and store process models for rapid reuse

Records: Access and use all data, from across all systems, and get current, complete information

Business Rules: Define and Enforce your critical policies and procedures

Complex Event Processing: Track, analyze, and respond to business events

Real-time visibility: Provide complete situational awareness of in-flight activities and task progress

Collaboration: See alerts in real-time, while finding collaboration opportunities, co-work tasks and actions, and resolve issues all from an intuitive user interface

Solutions for the Department of Defense

Enterprise Mobility: Provide critical stakeholders immediate access to data, activities, and tasking anytime on any device

Low-code: Use drag-and-drop, point-and-click design to launch applications, fast

Cloud & On-Prem: Our FedRamp certified Cloud, together with an on-prem option, support most workloads

- Budget POM
- Audits
- Inspections

Using Appian, Defense Information Systems Agency (DISA) created the cloud-based and mobile-enabled Integrated Defense Enterprise Acquisition System (IDEAS) — the largest and most comprehensive BPMbased acquisition management solution in the U.S. Federal Government. IDEAS connects 12 systems into one interface and manages all aspects of procurement work from pre-award to award and post-award activities.

Appian

Appian delivers a modern enterprise platform for digital transformation that is accelerating solution delivery for the benefit of Government stakeholders. Powered by Business Process Management (BPM) capabilities, Appian's approach enables critical services at a lower cost than traditional software development methodologies. With Appian, Federal Government key initiatives, including: Constituent Case Management, Regulatory and Statutory Compliance, Eligibility and Enrollment, Investigative Case Management, and Acquisition and Procurement can be easily deployed using our low-code approach, both in the cloud and on-premises.
