

## Modernize Government Acquisition

### Are you making key decisions based on outdated systems?

After just a short time, most acquisition systems become difficult to use and challenging to update, which renders them obsolete. Users become frustrated, hampered by slow decision-making and the burden of bureaucracy, despite technology that was supposed to help. Most of today's technology offerings for these systems have not kept up with the pace of change.

### Enter Appian.

Appian for Acquisitions modernizes what is often a disjointed process, especially within the federal government. Appian unifies and automates all aspects of the acquisition process and is easily configurable to any branch or agency's unique requirements for contract writing, requirements management, award management, source selection, vendor management, and clause automation. With Appian, you can deliver on the promise of convenience and compliance all from within a single application that eliminates the need to hop back and forth between multiple systems.

### Convenient. Frictionless. Powerful. Unified.

- Reduce training requirements with an easy-to-use interface.
- Integrate data from various systems, removing the need to "rip and replace."
- Automate repetitive tasks with Appian RPA and AI.
- Speed configuration with graphical "drag-and-drop" design tools.

### Appian for Federal and DoD.

Appian delivers a platform for federal and DoD acquisition that unifies powerful capabilities:

- **Business process management:** Reap the benefits of the leading platform for BPM.
- **Dynamic processes:** Handle dynamic and ad hoc contract management processes.
- **Complete information:** Unify all information on any topic and view it in a single, drillable report.
- **Business rules:** Create and manage business rules to quickly adapt to evolving policies.

### Appian for acquisitions.

- Make the right decisions based on data.
- Configure applications to your unique requirements.
- Easily adapt for different organizations and departments.
- Automate administrative tasks to prioritize high-value work.

### Standards compliant. Certified. Accredited.

Appian is certified and compliant with common government requirements:

- FAR and DFARS compliant.
- PRDS and PDS data structures.
- Certified BEA compliant.
- DIACAP, FISMA Moderate, SIPRnet, GIG approved.
- FedRAMP, HIPAA, SOC 2, and SOC 3.

- **Collaboration:** Take advantage of the brain power of your workers with social collaboration that uncovers new insights.
- **Agile delivery:** Simplify implementation with flexible deployment and integrations.
- **Low-code:** Use drag-and-drop, point-and-click design to launch applications, fast.

### Focus on acquisition.

- Acquisition package creation
- Acquisition RPA bots
- Acquisition template management
- AI-based recommendations
- Amendment creation
- Auto-filing of documents
- Automated clause selection
- CAC/ECA SoftCert authentication
- Closeout processing
- Complex approval routing
- Complex pricing arrangements
- Contract program management
- Contract writing
- Dynamic checklists
- Electronic PKI signatures
- FAR CLIN and SLIN rules
- FAR document numbering
- Forms (standard and DoD)
- IDV ceiling tracking
- Modification creation
- Optional items and option years
- PALT tracking
- PRDS/PDS data architecture
- Proactive alerts
- Purchase request creation
- Small business coordination
- Source selection management
- Warrant management
- Workload management

### Leading organizations trust Appian:

### Easy to integrate.

- SAM integration
- FPDS-NG integration
- DoD clause logic integration
- GEX integration
- PDS validation service integration
- USAspending integration
- O365 integration

## appian

Appian is a software company that automates business processes. The Appian Platform includes everything you need to design, automate, and optimize even the most complex processes, from start to finish. The world's most innovative organizations trust Appian to improve their workflows, unify data, and optimize operations—resulting in better growth and superior customer experiences.
