

Unified Law Enforcement Solution

Automate processes for inspections, enforcement, citation, and prosecution in a single application with Nuvitek's Unified Law Enforcement Solution.

In today's law enforcement back offices, siloed, outdated, and inefficient legacy systems result in long permit application processing times. Slow processing impacts not only constituents, who need their applications processed quickly, but also the agencies that oversee compliance and enforcement of permits.

Using separate systems for applying for and enforcing permits can cause **delays up to two months** and requires **cumbersome** back-and-forth communication between consumers, agents, and the general counsel. Duplicate data entry, rigid legacy systems, unintuitive user interfaces, and lack of data transparency are major hindrances to the permit process and lead to the following challenges:

- **Costly non-compliance and regulatory fines** result from the lack of an audit trail and centralized data.
- **Significant manual entry delays** are caused by a limited ability to enter data and evidence in offline environments.
- **Lack of collaboration** due to ineffective communication channels between law enforcement agents and legal bodies.
- **Lack of visibility** into permit, complaint, and enforcement workflow steps makes it difficult to identify and address risks and bottlenecks.
- **Customer dissatisfaction** caused by delayed processing.

Nuvitek Unified Law Enforcement Solution capabilities.

Built on the Appian Low-Code Platform, Nuvitek's Unified Law Enforcement Solution automates processes for inspections, enforcement, citation, and prosecution in one seamless application. The solution gives agents and officers a user-friendly way to access evidence offline in the field. It provides a holistic view of the compliance process, including processes for permits, complaints, and enforcement, in a centralized place. Other features of the Unified Law Enforcement Solution include:

- **Centralized data:** Easily track and manage tasks and bottlenecks related to law enforcement and General Counsel.

Built on the Appian Low-Code Platform, Nuvitek's Unified Law Enforcement Solution automates processes for inspections, enforcement, citation, and prosecution in one seamless application.

- **Automated workflows:** Cuts processing time by 50% via reduced data entry and validation check requirements.
- **Integration with eCFR** (electronic Code of Federal Regulations): Integration allows for quicker regulatory alignment.
- **Clearer strategy:** Guidance for regulatory accuracy, reduced time for judiciary approval, and quicker time to value.
- **Enhanced productivity:** Law enforcement agents can capture data, images, and video across offline environments.
- **Quicker document generation:** Dynamic and faster processing of citations, violations, permits, and sanctions.

The Nuvitek Unified Law Enforcement Solution drives real business impact.

Unified Law Enforcement Solution Features	Business Impact
Unified legal authorities	Use one system with role-based views and permissions that quickly shares data and streamlines the legal process for compliant documents.
Chain of custody	Conduct evidence and property tracking and document generation in a single application. This includes QR code mobile tracking.
LEAP timekeeping	Manage time in compliance with LEAP (to capture eligibility, employee coverage, rate, unscheduled duty, regular workday, premium pay, and Title 5 pay).
Settlement schedule and legal templating	Generate templates, conduct version control, and edit legal documentation. Use provided formulas to calculate settlement payments for fines and penalties.
Freedom of Information Act compliance	Easily access and provide information for compliance with FOIA requests and congressional inquiries. Protect sensitive information.
Legal dashboard	Access a KPI-driven dashboard with visibility for lawyers into historical and upcoming tasks, notifications, and calendar events.
Consistency checks	Use automated AI-driven checks to analyze previous gravity and culpability of cases to help inform legal charging decisions.
