¹ This refers to GFI Fund, which is a sub-fund of Guggenheim Global Investments PLC ("GGI"), an open-ended investment company with variable capital constituted as an umbrella Fund with segregated liability between sub funds, authorized and regulated by the Central Bank of Ireland ("CBI") as an Undertaking for Collective Investments in Transferable Securities ("UCITS"). Refer to "Important Information" on the back page.

The fund employs a total-return approach focused on achieving attractive risk-adjusted excess returns versus the Bloomberg U.S. Aggregate Index. The strategy is designed to use the collective insight of our fixed income investment team and invests across the full spectrum of the fixed income market, including Asset Backed Securities ("ABS"), Residential Mortgage Backed Securities ("RMBS"), Commercial Mortgage Backed Securities ("CMBS"), investment grade corporates, high yield corporates, bank loans, preferred stock, municipals, treasuries and agencies.

The fund is actively managed, meaning the investment manager will actively select, purchase and sell securities with the aim of meeting the investment objectives of the fund. The fund's performance is measured relative to the Bloomberg U.S. Aggregate Bond Index for comparison purposes only. The Bloomberg U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. The Index does not define asset allocation of the fund and depending on market conditions the fund may deviate significantly from the Index.

Fund Highlights

- Active management employing opportunistic positioning at the sector and security level with an emphasis on relative value, rather than index weightings.

- Focus on under-researched areas of the fixed income universe, including sectors not included in benchmark indices.
- Employ qualitative and quantitative tools to understand portfolio risks and opportunities.

1 Weighted average calculations are weighted by flat market value including cash and borrowings. **2** Weighted average life (WAL) to worst represents the average number of years before half of the principal balance is repaid excluding borrowings. **3** Weighted average effective duration of the securities comprising the fund portfolio. Effective duration takes into account any embedded options (i.e., a put or a call) and reflects the expected change in future cash flows caused by the options in response to changing interest rates. Bank loan duration is calculated using weighted average rate set life (WARSL). **4** Number of holdings based on CUSIP. **5** The current yield is annualized based on the latest quarterly distribution, which is comprised of income distributions as well as any tax equalization adjustments, if applicable, and is net of on-going charges/expenses. As of 29.2.2024. **6** Credit quality uses highest available Nationally Recognized Statistical Rating Organization (NRSRO) rating. Certain securities not rated by an NRSRO have been assigned an internal rating estimate which is reflected in the breakdown. **7** Other includes Equity, Municipal, Mortgage Loan, Private Placement Sovereign, CMBS Agency, Options, FX Forward, Futures and Interest Rate Swap. **8** Short-Term Investments may include uninvested cash, net unsettled trades, money market funds, commercial paper, repos, and other liquid short duration securities. **9** Performance shown is net returns, and assumes reinvestment of dividends and income and capital gains and is net of transaction costs.
