TRANSFORM YOUR analytic CUSTOMER EXPERIENCE WITH WATSON AI

Organizations are under pressure to provide answers quickly, all while experiencing unpredicted spikes in demand for support and services. Conversational AI can help businesses remain agile by increasing service availability, reducing costs and improving employee productivity.

ABOUT IBM WATSON ASSISTANT

Watson Assistant is an AI chatbot that lets you build, train, and deploy conversational interactions into any application, device, or channel. It knows when to search for an answer from a knowledge base, when to ask for clarity and when to direct users to a human.

3 EASY WAYS TO GET STARTED:

1. Encourage your customers to self-serve faster

Provide AI powered automated assistance to customers through web/mobile or voice channels.

2. Help your employees to self-serve

Support employees 24/7 by providing AI powered automated assistance through web/mobile or voice channels.

3. Assist your agents as they work

Enable human agents to better handle customer inquiries. Watson Assistant can even listen and suggest.

"CHATBOTS WILL SAVE BUSINESSES MORE THAN \$8 BILLION PER YEAR BY 2022"

newcomp () analytics

Newcomp's data science team has helped many clients build their very own chat experience with Watson Assistant. We'll work with your team to understand your goals and build and train your Al assistant to achieve them.

We took this experience and used it to design a workflow to get your chatbot up and running in as little as 15 days. From widget development to integration, testing, and team training – it's all in one package. Newcomp's Watson Assistant Bundle makes it easy for anyone to get started with your own AI chatbot.

Newcomp Assistant Hi! I'm a handy virtual assistant built by the lovely folks at Newcomp. How can I help? Type something...
