Q1 2024 Fact Sheet

FUND OBJECTIVE

The Nasdaq 7HANDL Index ETF seeks investment results that correspond generally, before fees and expenses, to the price and yield performance of the Nasdaq 7HANDL™ Index.

REASONS TO INVEST

Seeks High Monthly Distributions

Diversified Balanced Portfolio

INVESTMENT STRATEGY

- » The index is broadly diversified and seeks to offer the potential for high monthly distributions while maintaining a stable net asset value over time. However, the Fund will have risk characteristics similar to the broad U.S. capital markets and will generally rise and fall with prevailing market conditions.
- » The index represents an allocation to a balanced portfolio of U.S. equities, bonds and alternative investments that employs leverage in an amount equal to 23% of the portfolio.
- » The index consists of ETFs that are split into two equally weighted categories, a Core Portfolio and a Dorsey Wright Explore Portfolio. The Core Portfolio consists of a 70% allocation to U.S. aggregate fixed-income ETFs and a 30% allocation to U.S. large cap equity ETFs. The Dorsey Wright Explore Portfolio consists of an allocation to ETFs in various U.S. asset categories that have historically provided high levels of income, using a tactical asset allocation methodology developed in consultation with Nasdaq Dorsey Wright Investment Research & Analysis that seeks to incorporate momentum, yield and risk.

Shareholders should not assume that the source of a distribution from the Fund is net profit. Shareholders should note that return of capital will reduce the tax basis of their shares and potentially increase the taxable gain, if any, upon disposition of their shares.

The Nasdaq 7HANDL™ Index ETF¹ consists of two critical components:

1. A well-diversified, multi-asset portfolio of exchange-traded funds ("ETFs");
2. The Fund generally follows its index, which has the goal, but not the guarantee, of achieving a total return sufficient, over time and after expenses, to support a seven percent (7.0%) annual distribution rate. All or a portion of the distributions consist of a return of capital; and the rate may be modified at any time.

Growth of \$10,000: Ending March 31, 2024

Performance (%): Ending March 31, 2024

Annualized if greater than a year

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 855-HSS-ETFS or visiting strategysharesetfs.com. Market returns are based on the composite closing price and do not represent the returns you would receive if you traded the shares at other times. The first trading date is typically several days after the fund inception date. Therefore, NAV is used to calculate market returns prior to the first trade date.

¹Nasdaq 7HANDL™ Index (the "Index") seeks to create a diversified, multi-asset portfolio of ETFs optimized for enhanced returns over time using 23% structural leverage. The Index is comprised of ETFs that are split into two categories, a Core Portfolio and a Dorsey Wright Explore Portfolio. The Index is broadly diversified and seeks to offer the potential for high monthly distributions while maintaining a stable net asset value over time. The goal of the Index is to represent an allocation to a balanced portfolio of U.S. equities, bonds, and alternative investments that employs leverage in an amount equal to 23% of the total portfolio.

*A portion of the distribution consists of a return of capital.
