

Accessing Resources at Home

Third Space Learning provide maths support to schools through access to free downloadable resources on their online resource library, the Third Space Maths Hub.

Parents are also able to sign up for their own free Maths Hub accounts to access all Third Space Learning's free resources and support their children through school closures.

Inside the Maths Hub you'll find hundreds of free resources for Years 1-6, from worksheets to games to daily activities.

Resources can be filtered by year group, topic or category, making finding the resources you need quick and easy. The dedicated 'Home Learning' category contains all Third Space Learning's free resources that are most appropriate for use at home.

Creating your free parent account is quick and easy:

- 1** Head to mathshub.thirdspacelearning.com
- 2** Enter your details and select 'Parent' as your job title
- 3** Enter your child's school postcode and select their school from the list
- 4** Enter your email and choose a password

Please note, the Maths Hub is not compatible with Internet Explorer so you may need to switch to a different browser to create your free account and access the resources.

I must commend Third Space Learning for the amazing resources they provide and the excellent support they give to our children.
